There are two distinct types of bet you can make when playing online roulette inside and outside bets.

In roulette, an inside bet is where you put your chips on individual numbers inside the roulette grid.

Because you're focusing on individual numbers, rather than any red number for example, the roulette odds are significantly reduced.

However, with the higher risk comes a greater reward, so your payout would be more generous.

Putting your chips on a single number is called a straight-up bet, and this is the most common type of inside bet, paying out at 35:1 in European and American Roulette.

What is an outside bet?

You can choose to bet on a grouping of numbers, such as the first 12, second 12, or third 12, or alternatively pick between 1-18 or 19-36.

Experiment with different combinations to suit your preference, and remember you're playing free online roulette, so it's all for fun!

The other way is that the commission rate is based on how many products get shipped in a month. It is shown in the table below:

As you see, if the product shipped in a month is from 7% to 30%, you will get 6% commission rate instead of the rate of 4%.

Actually, the commission rates are not high and do not amount too much of a payday, if you do not sell expensive products or sell a lot of products per month.

As a result, I recommend you doing both of methods to increase your commission. My work is just simply to send customers to Amazon, and then I receive commission

when a sale was made.

Starting my own e-commerce website where each product would be sold via the Amazon Affiliate program

Choosing a niche that I could find about 20,000 items which half would have high price (over \$2,500) and other products have extreme cheap price (under \$5)

Here's how you can do that.

Captain John W. Trimmer wrote a book in 1993 titled "How to Avoid Huge Ships". This is presumably useful information for those that travel by sea. This

review, however, gives a different perspective on the matter.

"The next time you see a huge ship, please don't ignore it."

Pro Tip: Only 90 people found this helpful, and it's a casket, so implementing

humor in this specific use case may not make sense. But, you do have this review

information, and you can reach out for future campaigns to this repeat customer.
