Real or Fake? The First Review of Brahmastra Gives a Thumbs Down

The countdown for the release of Ranbir Kapoor's Brahmastra, which is already being systematically targeted by a section of audience, has received yet another blow as the first review of the film has given a thumbs down for the multilingual film.

Brahmastra

Brahmastra First Review

Umair Sandhu, who claims to be having access to some overseas censor board and posts film reviews on social media accounts, has claimed that the Hindi film lacks soul.

On the whole, brahmastra lacks soul. At the box-office, the publicity blitzkrieg

might ensure good returns in its opening weekend, but the cracks should start appearing sooner than expected, since the film fails to keep you hooked. Its fall

is imminent, [sic]" he wrote it on his Instagram account

On the other hand, a section of audience have targeted Brahmastra asking fans to

boycott the film. There are posting several instances of Ranbir Kapoor and Alia

Bhatt of insulting Hindu religion. Hence, people want the film to fail at the b

ox office.

Strategies for change

Set goals setting short-term and long-term goals may help you to stay focused

and clear about cutting down or giving up gambling.

These behaviours will weaken your resolve to control or stop your gambling.

Talk about it talking about gambling with somebody you trust and someone who

won't judge you can ease the pain of bottling it up.

When people lie about gambling and debts, they may sometimes try to gamble their

way out of debt, so they won't have to 'come clean'.

Giving up when you've spent hours each week gambling can make you feel tense and irritable.

You are more likely to lose control when you have bad times in other parts of y

our life that make you feel sad, anxious, angry or depressed.

Fill in the gap that gambling has left with new things to do.

[Image] Promising review: 'I've owned a couple of these and am super happy with them.

A water-resistant, wireless Bluetooth speaker you can use as a portable speaker

or as an external speaker - either way, it'll provide you with great sound

quality even when you're on your phone all day.

It's pretty much silent but the sound is still very clear, and the bass isn

't too loud.

' -Alexis 14.

A two-in-one wireless earbuds that can play music, charge your phone, and even use voice control for music, so you can work on your own playlist or podcast wit

hout worrying about what to do next.

I love the ability to connect it with my phone, my iPod touch and a pair of Blu
