Well earning money from Instagram is not an easy road it takes a lot of time consistency and uniqueness as people want to see something different. To earn money from Instagram you would need to pick out a niche and do brand collars which pay you for your following. That's an average of \$200 pm after months of hard work.

The answer is, quite a bit. And it depends. If you're able to market a product nicely, you'll probably get more than people who don't do it very well. Also, in some countries you won't be able to get money directly so companies might send their products in it.
