The Authorities That License the Top Casinos Online

So far, we've discussed how our best online casinos are overseen by trusted

authorities.

Their job is to protect players in a lot of jurisdictions.

If licensing rules aren't followed, casinos risk getting fined or suspended

If internal gambling is legal where you live, then you're better off visiti

ng casinos that are licensed locally.

We know, however, that many countries don't allow online gambling, or it ex

ists in a legal grey area.

This is the case, for example, with the best USA online casinos.

We provide a quick overview of the most important gambling authorities around th

e world below.

The peer review system has been the cornerstone of scientific publishing for cen

turies. Most reputed journals use peer review as they believe it assures some fo

rm of quality control in the scientific literature.

Peer review has many unseen costs directly related to publication of articles, e

ven though there are usually no monetary transactions involved in the process. T

he main costs have to do with time: time spent by the journal editors in arrangi

ng peer review and of course the time devoted by the peer reviewers in reviewing

articles. Reviewing a single article can take a day! The unpaid cost of peer re

view is estimated to be over £1.9 billion a year.

A vital, and often overlooked, aspect of peer review is that in the current syst

em, peer reviewers are normally not paid for their work. They are, instead, rewa

rded non-financially by means of acknowledgment in journals, positions on editor

ial boards, free journal access, discounts on author fees, etc. Associating with

reputed journals that include the names of reviewers as their "elite" c

ontributors is a major incentive for the reviewers. Moreover, the opportunity to

be a part of intellectually enriching professional debates and acting as a gate

keeper of science is another motivational factor. Thus, social obligation, intel

lectual contribution, and reputation seem to be the motivational aspects of the
