The National Union of Students is a non-profit corporation with a strong commitment to the advancement of the student-run university and the promotion of the university's education.

Board members who have committed to the NU Students have received their wish for their appointment.

We are excited to announce that we have been able to complete a list of new board members to be elected in February.

Board members who have committed to the NU Students will be selected to serve as a trustee of the university's board of trustees.

The anomaly score is defined as:

If all the instances return around 0.5, then the entire sample does not have any distinct anomaly.

Deal with Imbalanced Dataset

Downsampling Method (User Behavior Data)

The AUC and the specificity scores are the highest among all the models we've tried so far. Let's see if the text classification would perform better.

After comparing the AUC scores across all the models, we can conclude that the gradient boosting model using downsampling behavioral data has the best performance. For the next step, we can use a tuning technique grid search to find the optimal hyperparameters to improve the model performance.
