Mixed pair (two cards of the same value of any suit or colour) odds of 5:1

What is Handicap Betting?

Handicap betting is a way for the bookies to make a sporting contest a more even event.

So if City finished on 100 points after 38 games, Sheffield United would need 5

4 points as their handicap added to that, 47, would then give them 101 points.

Not even Chris Wilder, a man who has a penchant for overlapping center-backs would be able to do that one feels, even if they are now outsiders at 4/1 in Premier League betting to be relegated after a wonderful start, but you get the idea.

Power has made the Cowboys as -4.

Essentially handicap and spread betting is exactly the same thing with the only difference being in name.
