More on How to play Blackjack

Combining bets into a parlay makes them harder to win but increases their payout

Mobile betting platforms like BetMGM, FanDuel, and DraftKings also have parlay

formats.Warning

To calculate a payout:

Multiply the result by your bet amount.

This parlay pays out \$59.

Example of a Parlay Bet

Parlays can be more complicated and consist of more individual bets.

By pooling more bets into the same wager, the bettor assumes more risk and limits

their chances of winning.

However, so far, population data are very limited with respect to actual gambling

habits during the COVID-19 crisis.

A previous general population study (including both gamblers and non-gamblers)

in Sweden found a modest percentage reporting an increased gambling behavior during

the crisis.

Only individuals responding "10 times or more" were further considered

in the study.

Interventions may also involve an increased awareness in mental health care or

social support settings, where hazardous gambling patterns can be screened for in

times of a financial crisis.
